1.11. Change Wi-Fi Name and Wi-Fi Password

• Click "Network & General"

• Click Your Wifi Name

Choose ament icon

googlewifi is the main Wi-Fi network for your home.

Guest Wi-Fi

w		🛞 🚾 💎 📶 24% 🛢 6:05 PM		
×	Wi-Fi settings		SAVE	
Netwo	ork name			
goo	oglewifi			
Passv	word			
•••	•••••			
	Show	8 chara	cters minimum	

Change the Network name and password

Click "Guest Wi-Fi"

Click "Next"

Give your Wi-Fi a name

Your Guest Wi-Fi will need a name and password. No need to write this down though-you can share it with guests from the app anytime.

NEXT

Click "Next" .

Set the guest wi-fi name and password here

Click "Next" NEXT

Choose devices

'googlewifi-guest' will be a separate Wi-Fi network. You can choose to make some devices on your main network available to guests, so they can do fun stuff like stream cat videos to your TV.

Just a few seconds...

DONE

Click "Done"

Now that you're all setup... googlewifi-guest is setup and ready to go. Once connected, guests can visit 'on.here' in their browser to discover and interact with the device you've made available.
